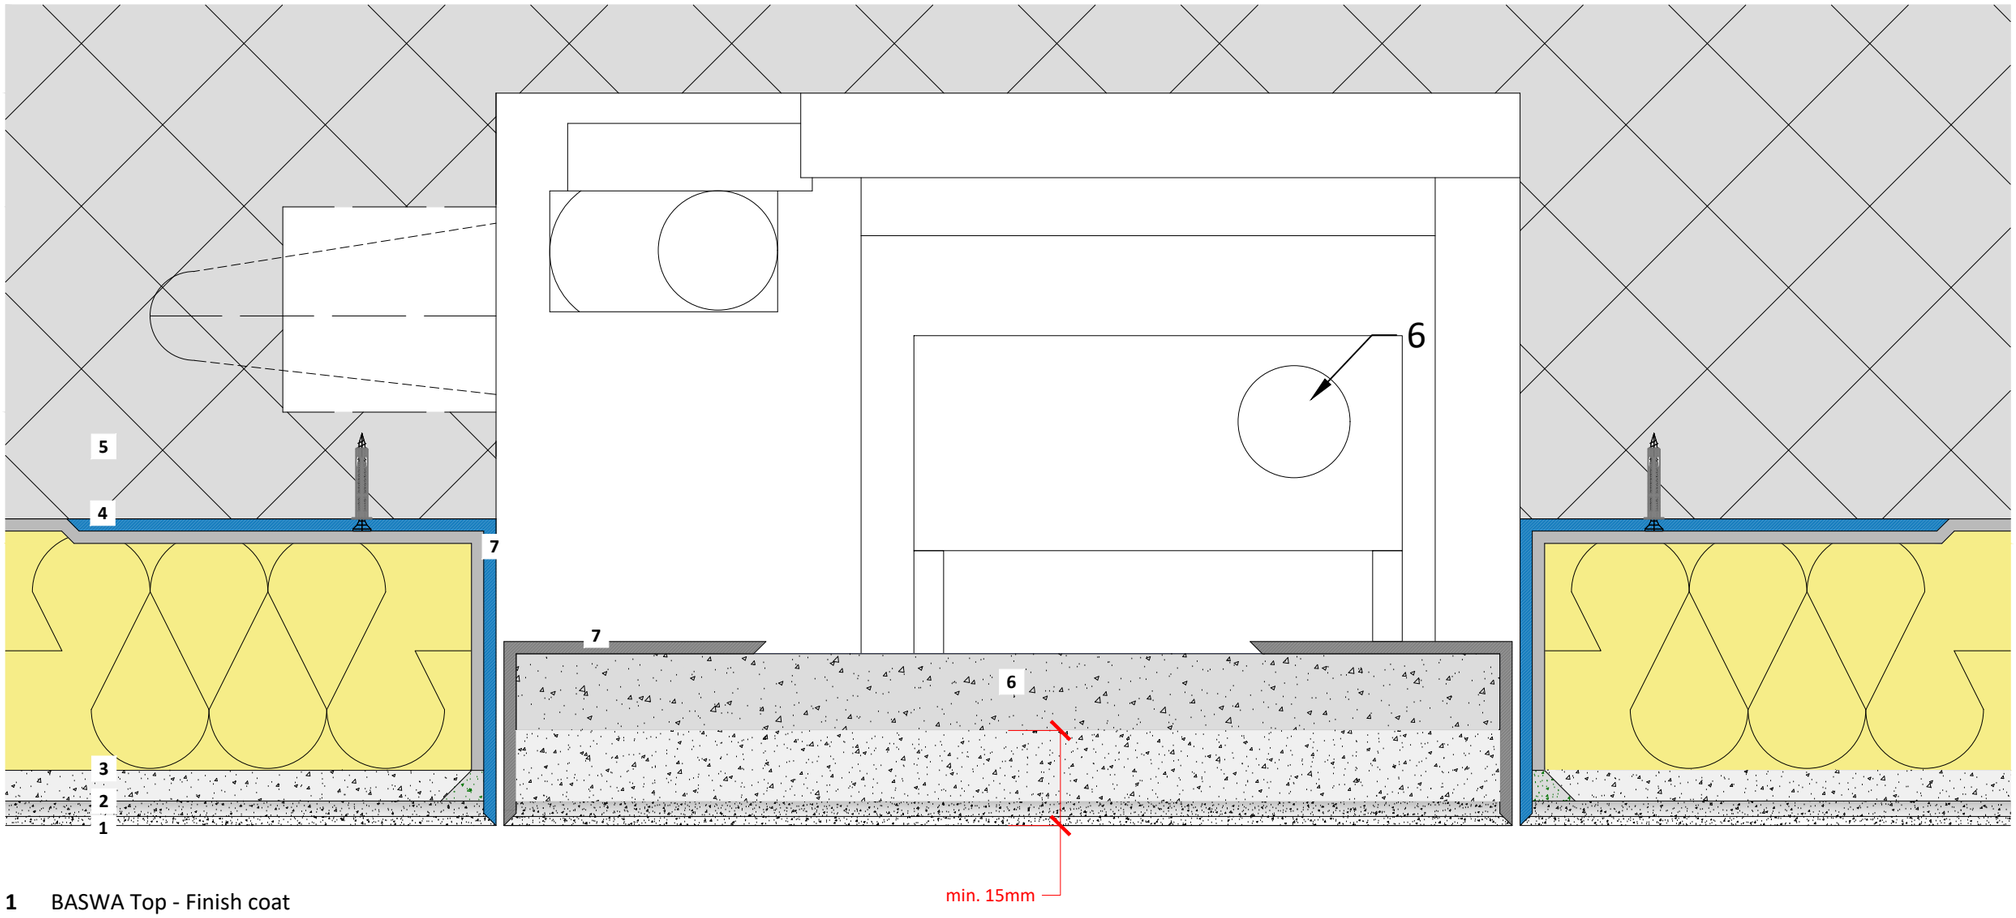
Installation of projector hoist (beamers and similar)

Important
Irregularly occurring soiling during the period of use can be avoided by using the BASWA Phon acoustic inlay. (See planning documents page 15-16 / hybrid system) Acoustic panels glued front side against angle profile!



1 BASWA Top - Finish coat
2 BASWA Base - Base coat
3 BASWA Phon - Acoustic panel
4 BASWA Fix C - Adhesive cement-containing mortar
5 Concrete
6 BASWA Acoustic Inlay for access panels and projector hoists
7 L-angle profile aluminium a271/a348 or PVC a314/a316

The structural, static and physical construction characteristics of BASWA Phon acoustic systems can only be reached if the sole use and processing of BASWA Phon system components according to processing guidelines is ensured.
